Warning

The Work, and the software that is the subject of the Work, including icons, graphical symbols, file formats, and audio-visual displays, may be used only as permitted under license from Intergraph; contain confidential and proprietary information of Intergraph and/or third parties which is protected by patent, trademark, copyright and/or trade secret law; and may not be provided or otherwise made available without proper authorization. The Work may not be reproduced in any manner, including for resale or redistribution, without the prior written permission of Intergraph. Use of the software during the training course shall be in accordance with the End User License Agreement ("EULA") delivered with the software. Neither the software nor the software documentation may be reproduced in any manner, without the prior written permission of Intergraph.

About This Manual

The Work is an instructional document designed to be an integral part of the training course offered by Hexagon Geospatial. Hexagon Geospatial believes the information in the Work is accurate as of its publication date. Any specifications cited in the Work are subject to change without notice. The information and the software discussed in the Work are subject to change without notice. Intergraph is not responsible for any errors that may appear in the Work.

Intergraph, the Intergraph logo, ERDAS, ERDAS IMAGINE, IMAGINE Essentials, IMAGINE Advantage, IMAGINE Professional, IMAGINE VirtualGIS, GeoMedia, ImageStation, Video Analyst, Stereo Analyst, TopoMouse, Hexagon Smart M.App, and Power Portfolio are trademarks of Intergraph Corporation. Table of Contents

Table of Contents	5
Section 1: The ERDAS IMAGINE Viewer.....	17
Task 2: Displaying an Image.....	21
Task 3: Opening Vector Data	26
Task 4: Opening Multiple Views	28
Task 5: Linking Views	29
Task 6: Viewing Metadata	31
Task 7: Connecting to Basemaps.....	34
Section 2: Using Band Combinations and Indices	37
Task 1: Defining band combination display.....	39
Task 2: Indices.....	42
Task 3: Using an Index to Identify Water	44
Section 3: Customizing IMAGINE	47
Task 1: Customize My Workflow Tab and Layout Gallery	49
Task 2: Customize Quick Access & Smart Controls.....	54
Task 3: Create a New Shoebox	56
Section 4: Importing and Reprojecting Data.....	63
Task 1: Import Data: Landsat 8 from USGS	65
Task 2: Import Data: Generic Binary Format.....	69
Task 3: Import Data: Batch Import TIF to ECW.....	71
Task 4: Reprojecting Images.....	76
Section 5: Spatial Enhancement.....	79
Task 1: Spatial: Resample Pixel Size.....	81
Task 2: Pan Sharpen: HCS Resolution Merge	84
Task 3: Pan Sharpen: Batch Processing	87
Task 4: Spatial: Convolution Edge Enhancement	91
Section 6: Spectral Characteristics	95
Task 1: Adjust Radiometry.....	97
Task 2: Viewing Pixel Values.....	102

Task 3: Spectral Profile	106
Task 4: Breakpoints.....	110
Task 5: Image Chain: Color Tables	113
Section 7: Subsetting an Image	121
Task 1: Subset by AOI	123
Task 2: Creating Shapefiles and Defining Attributes	128
Task 3: Subset by Shapefile Attributes	131
Task 4: Dice Image	133
Task 5: Dicing an image with a Shapefile.....	134
Section 8: Unsupervised Classification	137
Task 1: Unsupervised K Means Classification	139
Task 2: Renaming Classes	142
Task 3: Recoding Classes	143
Task 4: Cleaning Up A Classification	145
Section 9: Supervised Classification	149
Task 1: Collecting Spectral Signatures	151
Task 2: Image Association.....	155
Task 3: Collect Additional Signatures	157
Task 4: Evaluating Signatures	161
Task 5: Mean Plots.....	163
Task 6: Image Alarms.....	165
Task 7: Supervised Classification	170
Task 8: Calculate Total Area of a Classified Land Cover	172
Section 10: Mosaics in IMAGINE	175
Task 1: Creating a Virtual Mosaic	177
Task 2: Using MosaicPro	179
Task 3: Generate Seamlines	181
Task 4: Color Corrections.....	184
Task 5: Setting Exclude Areas	185
Task 6: Select Use Illumination Equalizing.....	189
Task 7: Set Image Dodging.....	190
Task 8: Color Balancing.....	193
Task 9: View a Preview	195

Task 10: Output the Mosaic	196
Task 11: Comparing and Contrasting Results	198
Task 12: Mosaic Test.....	200
Section 11: Point Clouds.....	202
Task 1: Display Point Cloud Data in a 2D View	204
Task 2: Change Color Slice	206
Task 3: Viewing by Intensity and Returns.....	207
Task 4: Rectangular Profiles and Editing Points	211
Task 5: Classifying and Filtering Point Clouds.....	214
Task 6: Linear Profile View and Mensuration.....	219
Task 7: RGB Encoding a Point Cloud	223
Task 8: View Photogrammetric Point Cloud in RGB	225
Task 9: View Point Cloud in 3D	226
Task 10: Viewing Point Clouds as Relief	228
Task 11: Creating a Painted Relief Image from a LAS Dataset	229
Task 12: Shaded Relief with Level Slice Overlay	230
Task 13: Point Cloud compression LAS to LAZ or HPC.....	231
Section 12: Examining Elevation Data.....	234
Task 1: Viewing Elevation Data as Relief	236
Task 2: Examining Elevation	237
Task 3: Using a Vector Layer to Create a Spatial Profile.....	239
Task 4: Creating a Surface Profile	241
Section 13: Terrain Prep Tool	244
Task 1: Split Terrain Files	246
Task 2: Merge Terrain.....	247
Task 3: Creating a Digital Surface Model from a LAS file.....	249
Task 4: Creating Vector Contours	250
Section 14: Topographic Relief	254
Task 1: Shaded Relief.....	256
Task 2: Painted Relief	257
Task 3: Level Slice	258
Task 4: Shaded Relief with Level Slice Overlay	259

Section 15: Contour, Slope and Aspect	262
Task 1: Create a Raster Contour	264
Task 2: Create a Vector Contour.....	266
Section 16: Raster GIS Tools for Site Suitability Assessment.....	270
Task 1: Preparing Data Layers	272
Task 2: Buffering the Search Distance	273
Task 3: Recoding Values	275
Task 4: Identify Landcover Type	276
Task 5: Combining Data Layers.....	277
Task 6: Identifying Areas Meeting the Criteria.....	280
Task 7: Overlay Files	283
Section 17: Change Detection.....	286
Task 1: Histogram Matching.....	288
Task 2: Co-Registration with AutoSync.....	290
Task 3: Image Difference Change Detection	292
Task 4: Preparing Data Layers	295
Task 5: Change Detection with DeltaCue	298
Task 6: Mississippi River Flood Change Detection.....	304
Section 18: Rectification Workflows	313
Task 1: Start Multipoint Geometric Correction Workspace	315
Task 2: Collect GCPs.....	317
Task 3: Resample the Image	320
Task 4: Verify the Rectification Process.....	321
Section 19: Mission Planning with Virtual GIS.....	324
Task 1: Starting VirtualGIS and Opening a DEM	326
Task 2: Raster Image Overlay	329
Task 3: Creating a Project File	332
Task 4: Set Up for Navigation	333
Task 5: Position Mode	334
Task 6: Alter the Scene Rendering Parameters	335
Task 7: Target Mode	336
Task 8: Bird's Eye Mode.....	337

Task 9: Terrain Following Mode	338
Task 10: Shapefiles in a 3D Scene	339
Task 11: Annotation Layers in a 3D Scene	340
Task 12: Creating a Flood Surface	344
Task 13: Placing 3D Models in VirtualGIS Scenes	346
Task 14: Create a New Logo Layer.....	350
Task 15: Flight Path Editor	351
Task 16: Start the Movie Recording Utility.....	355
Task 17: Create a Mist Layer.....	356
Task 18: Open the Viewshed Module.....	358
Task 19: Insert an Observer	361
Task 20: Add and Orient Other Observers	364
Task 21: Animating Model with the Animation Tool.....	366
Task 22: Animate a Model using the Animation Tool	370
Task 23: Animate a model using the Animation Tool.....	372
Task 24: Import Model Coverage	373
Task 25: Create a Vector Polygon file to Populate a Model Layer	377
Section 20: Frame Camera Orthorectification	380
Task 1: Importing Reference Points.....	382
Task 2: Examining Camera Calibration Information	386
Task 3: Measuring Fiducials.....	388
Task 4: Setting Projection and Saving the Model	392
Task 5: Measuring Ground Control Points.....	393
Section 21: Understanding Spatial Models.....	402
Task 1: Spatial Model Basics	404
Task 2: Command Line Operator	409
Task 3: Basic Model Batching	411
Task 4: Moving Window Statistics.....	414
Task 5: Custom Principal Components	420
Task 6: Adding a Custom Button to the Ribbon	427
Task 7: Cell-Size Vector Buffer	430

Section 22: Python Scripting with Spatial Modeler.....	437
Task 1: Configuring Python for Use with Spatial Modeler.....	440
Task 2: Summing Image Layers.....	442
Task 3: Preview an Output in ERDAS IMAGINE	444
Task 4: Saving a python script as a Spatial Model (*.gmdx).....	445
Task 5: Loading and Executing a Saved Model.....	448
Task 6: Setting a No Data region on an image.....	450
Task 7: Modifying a Spatial Model	453
Task 8: Viewing a Spatial Model in the Editor	454
Section 23: Combine Vector Class to a Classified Landcover Image.....	457
Task 1: Examining Data and Set Preferences	459
Task 2: Connecting to a GeoMedia Warehouse	460
Task 3: Create a New Spatial Model.....	463
Task 4: Changing NoData values and Connecting the Flow	465
Task 5: Adding an Either/or Condition and Preview	467
Task 6: Attach Attributes to Output File.....	469
Task 7: Add Input Ports and Output Model.....	471
Section 24: “Tidy Up” a Classified Image.....	477
Task 1: Add Inputs and Define the Matrix Kernel.....	479
Task 2: Add the Focal Majority Function and Preview the Model	481
Task 3: Add the Tidy Up Model to the Combine Vector Class Model	483
Section 25: Locate Site for Military Barracks	487
Task 1: Add and Recode Raster Input.....	489
Task 2: Search from Water and Identify Forest Pixels.....	492
Task 3: Calculate Slope from a DEM and Run the Model.....	495
Task 4: Creating Custom Color Tables	498
Task 5: Create a Custom Class_Names Table and Column.....	500
Section 26: Helicopter Landing Zones Model	505
Task 1: Identify Areas of Suitable Land Cover	507
Task 2: Calculate Percentage Slope	509
Task 3: Combine Land Cover and Slope Constraints	511
Task 4: Apply Minimum Width	512

Task 5: Apply Minimum Area	516
Task 6: Attach Colors and Attributes.....	519
Task 7: Set Ports to Create a GUI.....	522

Section 27: IMAGINE Photogrammetry – Creating a Block Error! Bookmark not defined.

Task 1: Setting up Preferences	Error! Bookmark not defined.
Task 2: Display a Raw Scanned Aerial Photo	Error! Bookmark not defined.
Task 3: Customizing the Quick Access Toolbar.....	Error! Bookmark not defined.
Task 4: Locating and Identifying Features	Error! Bookmark not defined.
Task 5: Defining the Project.....	Error! Bookmark not defined.
Task 6: Setting up the Camera Information	Error! Bookmark not defined.
Task 7: Adding Images	Error! Bookmark not defined.
Task 8: Creating Pyramid Layers.....	Error! Bookmark not defined.
Task 9: Inside the Sensor	Error! Bookmark not defined.
Task 10: Exterior Orientation Importing Exterior Orientation ..	Error! Bookmark not defined.

Section 28: IMAGINE Photogrammetry – Taking Control..... Error! Bookmark not defined.

Task 1: The Stereo Point Measurement Tool	Error! Bookmark not defined.
Task 2: Import Ground Control Points.....	Error! Bookmark not defined.
Task 3: Collect GCPs.....	Error! Bookmark not defined.
Task 4: View, Verify, and Re-Measure.....	Error! Bookmark not defined.
Task 5: Creating Tie Points - Manual	Error! Bookmark not defined.
Task 6: Creating Tine Points - Auto.....	Error! Bookmark not defined.

Using this Manual

Introduction

This manual contains step-by-step instructions on how to perform certain processes. You should be aware that each exercise provides a single path through an ERDAS IMAGINE tool. In most cases, there are various ways to maximize tool usage, depending on the individual project.

This exercise manual is provided to the student, along with all images and copies of the presentation slides used by the instructor. This provides the capability for recreating the processes performed in class at a later date, as well as key point on any theory involved.

Exercise Conventions

Section Title Page	States the objective of the exercises and lists the application tools to be utilized within the various tasks
Exercise Tasks	Each exercise is split into a set of tasks. After the course, these tasks will help you locate within the manual where you performed a certain set of steps
Questions	These appear in a larger font with bold and <i>italic</i> attributes. The instructor may quiz and/or review with you, following each exercise
Class Notes	These pages follow the end of each exercise on which notes from your studies can be made

Notational Conventions

Bold italicized Text	Any text, which is bold, indicates a <i>filename</i> , or parameter to be changed or selected
Graphics	To help you locate icons and objects used in the exercises, the icons will be next to the icon name in the text
Insets	These italicized captions will appear in the outside margin of the page. They define terms or explain theory behind the steps you are being asked to perform
Diagrams	These are an optional means to direct you in the usage of some of the application

The following graphics are also used for particular purposes.

This is a note or a quick tip. It gives additional relevant information, or describes other ways of using the software.

This is information relating to the application of the current tools.

This is a warning. It cautions you regarding potential pitfalls and how to avoid producing errors.

This is a reference. It provides additional theory or science that will help in using the tools.

Mouse and Keyboard Conventions
